Chronic Pain Plan Companion

UI mockups v3 · demo user: Maria Lutke

DESIGN RULES

- Body text 18 pt, captions 16 pt minimum; buttons 56 pt+
- One question per screen, one main button
- Four tabs only: Home, Insights, Plan, Settings
- Plain words, never colour alone (numbers, icons or labels too)
- Only options from the clinician's plan are suggested
- Nothing is saved or changed without a confirm

VISUAL STYLE

Inspired by the Alberta Health Services (AHS) website: AHS blue for actions, AHS green for positive states, dark grey text, light blue-grey panels, flat corners. Helvetica stands in for a system sans-serif. Colours are from public listings; verify against the live AHS site. Not an AHS product.

Blue	Blue dark	Green	Text	Panel	Focus	Alert
#007AC2	#005A8F	#00B374	#333333	#F2F6F9	#FEBA35	#B42318

SCREENS

2	Home
3	Exercise detail
4-7	Before and during exercise: pain rating, session confirmed, choose level, timer
8-12	Daily check-in: pain, recovery, exercise log, anything different, done
13	Weekly check-in (PEG, question 1 of 3)
14-17	Insights: week, month, day, export PDF
18-22	Plan: view, update, review photo result, exercise reminder times (new), history
23-30	Settings: main, add condition, add medicine, notifications, calendar (new), suggested time (new), health info, account
31-32	Reminder screens: medicine, exercise
33-34	Account creation (new): about you, set up your day

NOTES

Demo date: Sun Nov 15, 2026 (day 7 of 21). Fatigue and daily-life questions use the pain layout (page 8); weekly questions 2 and 3 use page 13. Data: Appendix A. New in v3: pages 21, 27, 28, 33, 34.

Sunday, November 15

Good morning, Maria

Weekly check-in is ready

3 quick questions · about 1 minute

Start

EXERCISES TODAY

Today's exercises

Up to 2 minutes · 10:30 am

Gentle tendon glides · 1 exercise

Time is confirmed after you rate your pain.

See exercises

Gentle tendon glides

Right hand · Day 7 of 21

TODAY'S SESSION

Up to 2 minutes, once today

The most your plan allows on days 1 to 7. Time includes short rests.

HOW TO DO IT

1. Hand upright, fingers and thumb up
2. Hook: bend middle and end joints
3. Loose fist: bend the big knuckles
4. Straight fist: open end joints a little
5. Return to the start

One cycle takes 10 to 15 seconds. Rest 20 to 30 seconds between cycles. Slow and comfortable.

Stop and get advice for new numbness, tingling, weakness or swelling.

Start

Choose a different level

How much familiar hand pain do you have right now?

Rate it before every session, at about the same time each day.

0	1	2	3 ✓
4	5	6	7
8	9	10	

0 = No pain

10 = Worst imaginable

You chose: 3

Next

Back

Your session today

TODAY'S SESSION

2 minutes

Once today · includes short rests

Why 2 minutes?

Your pain today (3) is the same as yesterday (3), so your time stays at 2 minutes. This is the most your plan allows this week.

Your plan allows an increase no sooner than Nov 20, if your pain stays steady.

Start timer

Choose a different level

Back

Today's level

We suggest 2 minutes. You choose.

Planned: 2 minutes Suggested

As planned for today. Slow, comfortable glides with short rests.

Shorter: 1 minute

The smallest session your plan allows.

Rest today

Skip the session. It is logged as missed and is not made up later.

Only options from your physiotherapist's plan are shown.

Start: 2 minutes

Back

Gentle tendon glides

Go slowly and breathe normally. One cycle takes 10 to 15 seconds. Rest between cycles.

Pause if discomfort keeps building or feels different from usual.

Pause

Finish session

Question 1 of 6

Your pain

On average, over the past 24 hours

0	1	2	3 ✓
4	5	6	7
8	9	10	

0 = No pain

10 = Worst imaginable

You chose: 3

Next

Is your pain back to normal for you?

Normal means the level you and your physiotherapist agreed is OK.

- (●) Yes, back to normal
- ( ) Still more than normal
- ( ) Not sure

When did it settle?

- ✓ Same day
- Next day
- Later

Next

Question 5 of 6

Your exercise today

Gentle tendon glides · planned 2 minutes

Minutes done
including short rests

2 min

How did it feel afterward?

- (•) Familiar, within my agreed range
- ( ) Familiar, more than agreed
- ( ) New or different

Any new symptoms?

- [x] None
- [ ] Numbness
- [ ] Tingling
- [ ] Weakness
- [ ] Swelling
- [ ] Other

Next

Back

Question 6 of 6

Anything different lately?

Tick any that apply. This helps explain your numbers.

- [ ] Unusually hard activity
- [ ] Feeling ill
- [ ] Medicine changed
- [ ] Used more pain medicine than usual

Add a note (optional)

Finish check-in

Check-in saved

Thank you.

TOMORROW

Monday, November 16

Gentle tendon glides · 10:30 am

✓ Starts at 2 minutes

We confirm your time after you rate your pain.

Your plan allows an increase no sooner than Nov 20.

You can always choose a different level from your physiotherapist's plan.

Done

What number best describes your pain on average in the past week?

0	1	2	3
4	5	6	7
8	9	10	

0 = No pain

10 = Pain as bad as you can imagine

Wednesday, November 11

Pain

Before exercise: 5, up 2 from Tuesday
Average over the day: 5
Back to normal: next day

Fatigue and daily life

Fatigue: 4
Daily life: 4

Exercise

Planned 2 min, shortened to 1 min
Completed: 1 minute
Familiar, within agreed range

Why

Pain was 2 points higher than the day before, so your plan reduced the time by 1 minute.
